

Single Point Cams - Flexi-System

for cam latches and locks - steel - 8 x 8 Sq.

Latches

CC0020

LATCHES

Material

Steel, zinc plated.

Technical Notes

Use formula to calculate ch (required cam off-set), and select from product table below;

$ch = h - lh$ where;

ch = required cam off-set/height.

h = grip length (distance between inside of latch face and front of cam).

lh = body length of cam latch/lock to be used (see individual latch/lock product table).

Refer to installation drawing below.

Important Notes

Suitable for Flexi-System latches. „With projection“ type ensures correct location and prevents cam rotating over 45°. See **cam selection chart for specific latch/lock suitability.**

Sold subject to pack quantity.

Calculation of correct cam off-set

Cam Off-Set (dimension ch)

To ensure your cam fully and correctly engages with the frame of your door the correct cam off-set must be selected. A cam off-set can be either negative (-ve) or positive (+ve).

Cam Length (dimension cl)

Impacts reach of the cam to door frame and hence impacts positioning of cam body for installation. Cam length or reach is measured from the centre of the cam fixing hole to the cam's leading edge. Refer to individual cam body datasheets.

Cam off-set

Use the formula to calculate your correct cam off-set:

$ch = h - lh$
 ch = the required cam off-set.
 h = distance between inside of lock face and front of cam (also referred to as "grip length").
 lh = length of cam body to be used (refer to individual cam body data sheets).
